

European Union's REACH Regulation Declaration

Revision 1, August 2009

This declaration has been composed by the Vice President Quality Management of Cinterion Wireless Modules GmbH

The European REACH regulation 1907/2006 on Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH) is launched on June 1, 2007, and affects all companies producing, importing, using, or placing products on the European market. The target of the REACH regulation is to ensure a high level of protection of human health and the environment from chemical substances.

The European REACH regulation and more detailed information about REACH can be found under www.REACH-helpdesk.de.

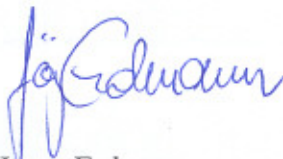

With reference to the paragraph 3 of the REACH Article 3 the products and components delivered by Cinterion Wireless Modules are classed as 'articles'.

These products / articles under normal and reasonable conditions of use do not have intended release of substances; therefore the requirement in REACH Article 7 (1) (b) for registration of substances contained in these products/articles does not apply.

In addition we confirm that products and components delivered by Cinterion Wireless Modules do not contain 'Substances of Very High Concern' (SVHC) with more than 0,1%w/w as defined by REACH Article 57, Annex XIV, Directive 67/548/EEC. Hence the requirement in REACH Article 7 (2) to notify ECHA if a product/article contains more than 0.1% w/w of an SVHC and tonnage exceeding 1 tonne per importer per year is not applicable.

The products of Cinterion Wireless Modules are produced by electronic manufacturers, who are considered in REACH as downstream-users exempt from accomplishing a registration or pre-registration.

In case of any further questions please do not hesitate to contact your regional sales representative of Cinterion Wireless Modules.

Joerg Erdmann

Vice President Quality Management
